

DBMS Project

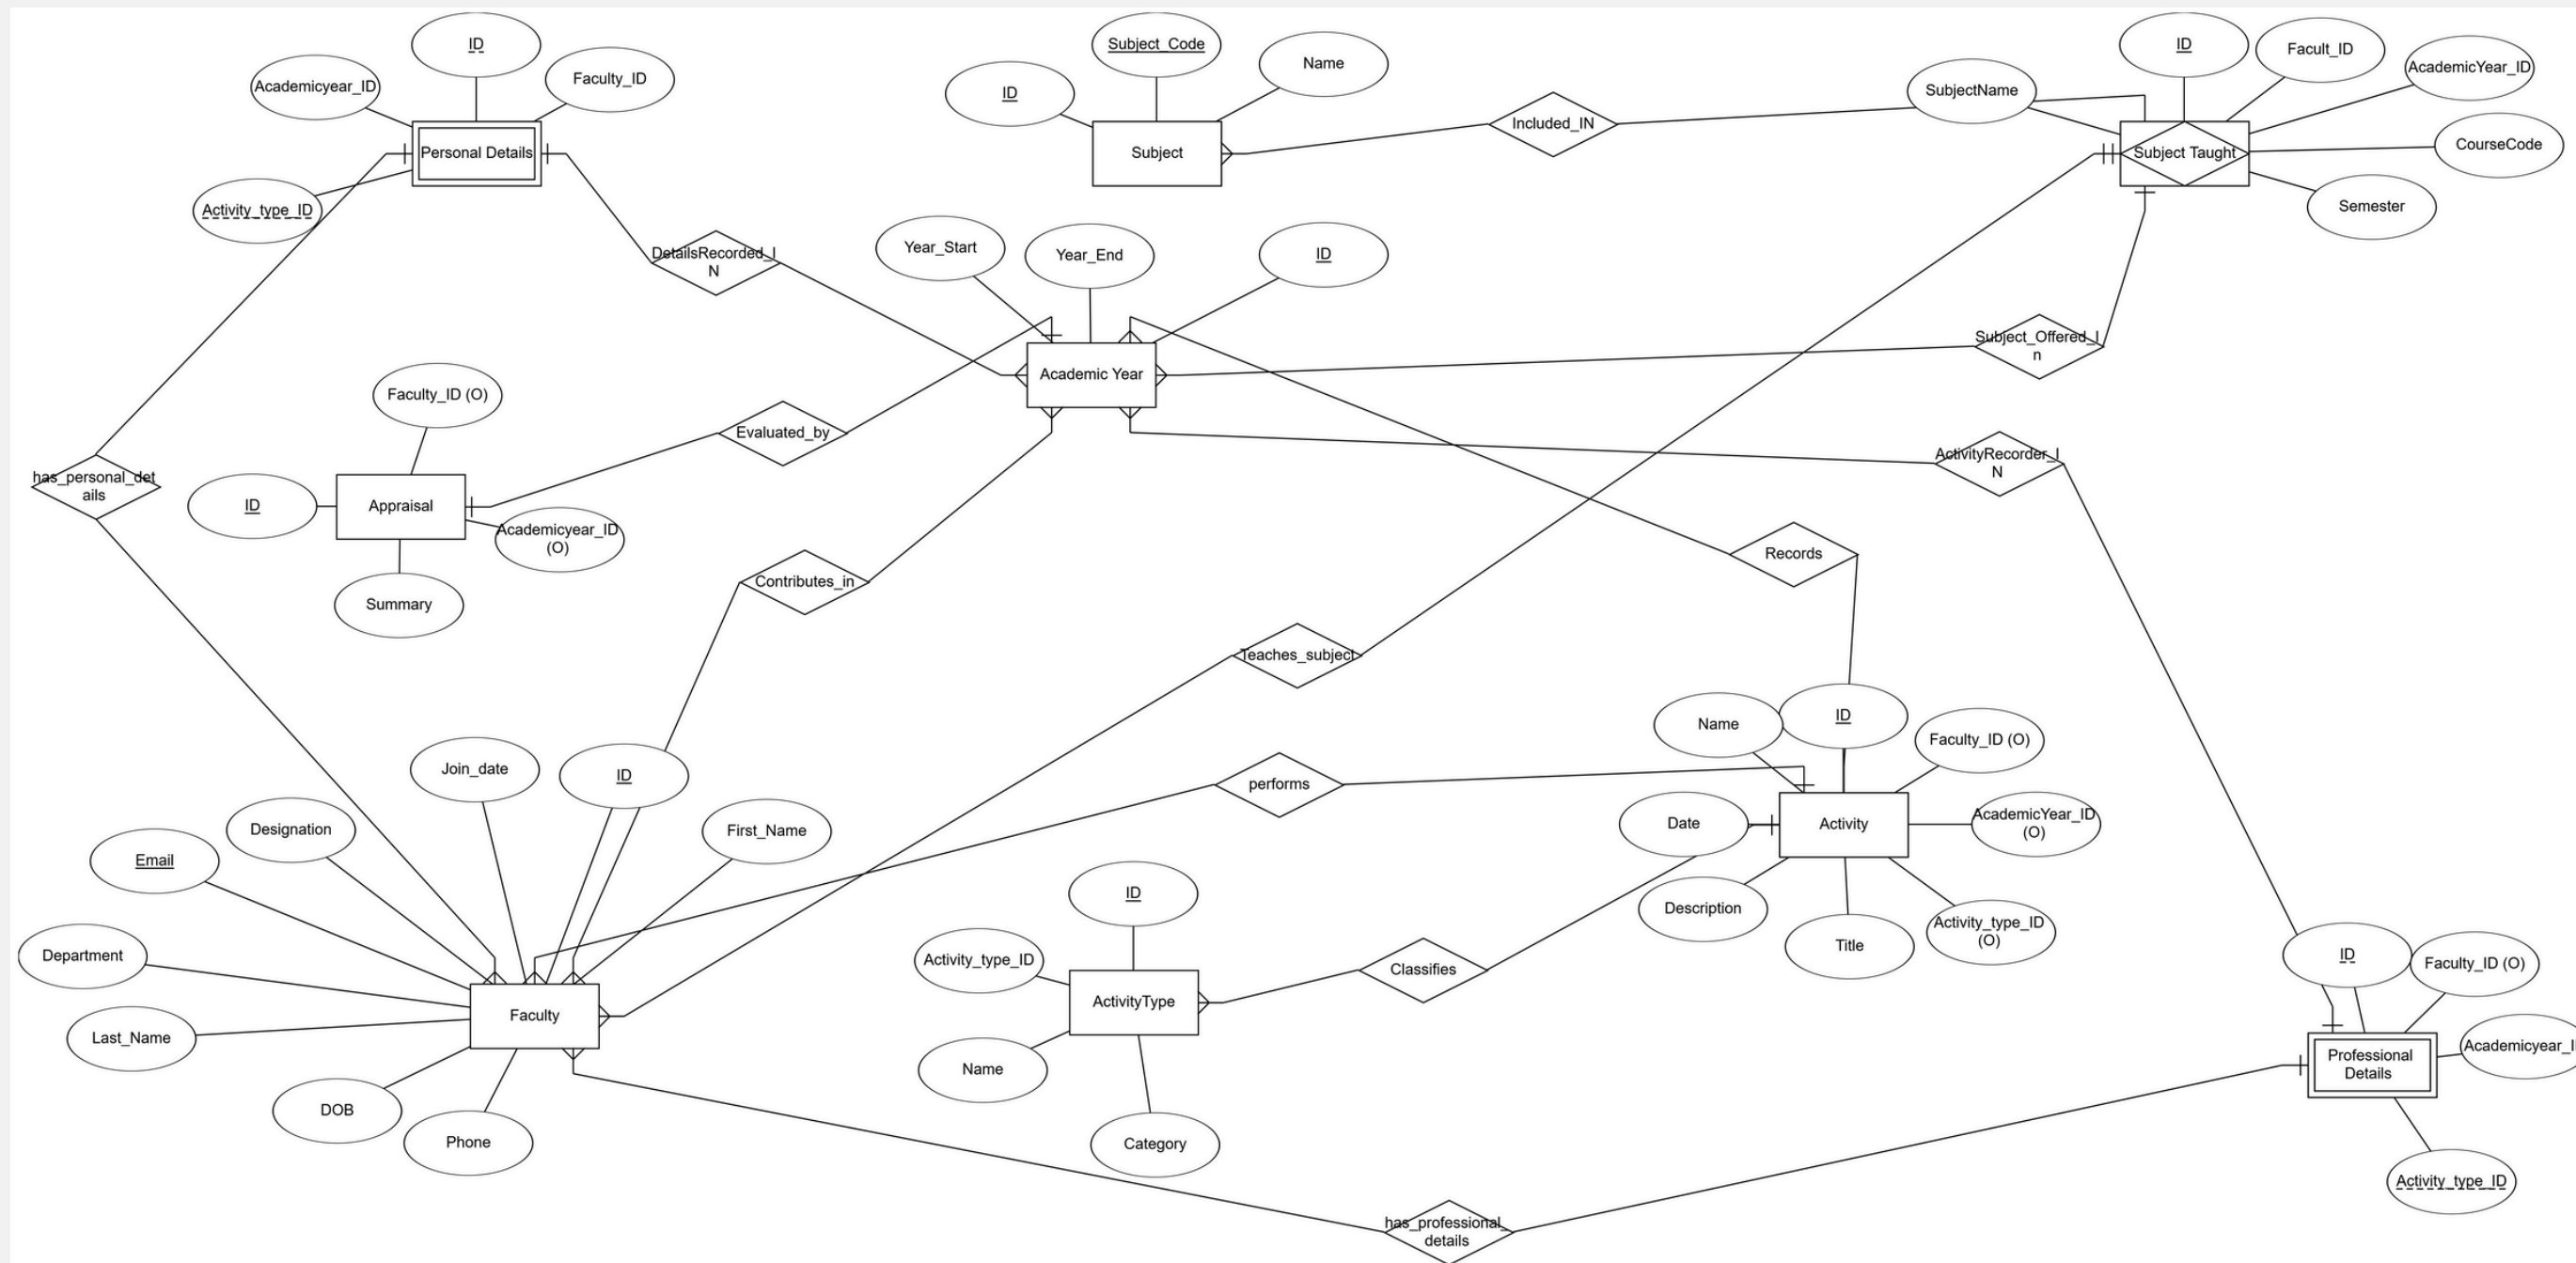

Introduction

Our project is a digital platform for managing faculty records, subjects, publications, and professional achievements across academic years—designed to streamline departmental operations in colleges.

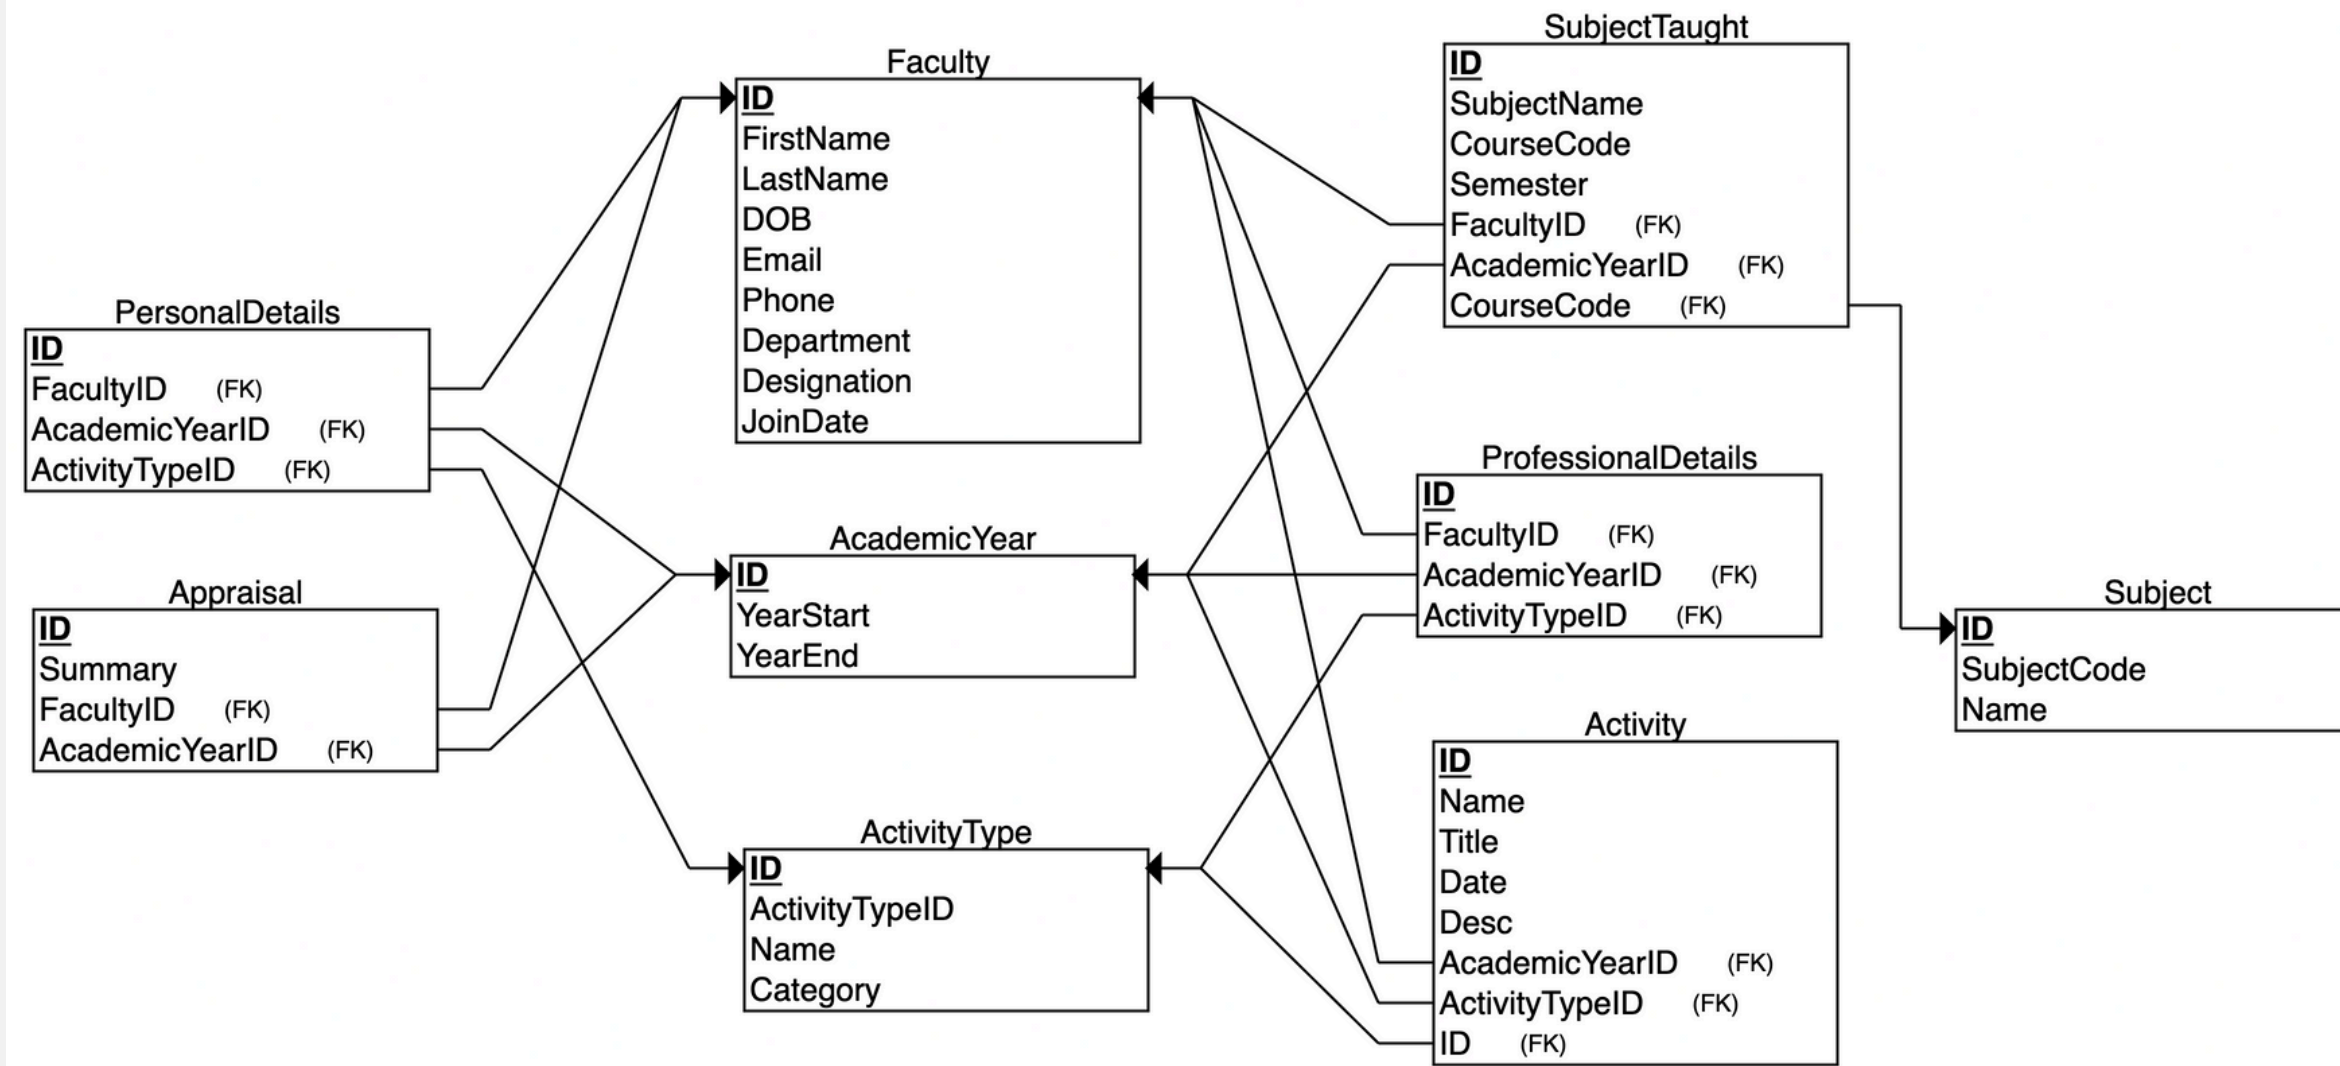

By capturing detailed academic and professional information for each faculty member, the system ensures transparency, easy data retrieval, and streamlined reporting. The modular design allows the application to scale with institutional growth and adapt to changing academic structures. Ultimately, FacuTrack serves as a reliable tool for administrative staff and faculty to manage records efficiently while supporting accreditation processes, performance evaluations, and academic audits.

Entity-Relation

Schema

The background is a light gray color, decorated with various hand-drawn blue doodles. These include several loops and swirls in the top left, a scribbled circle in the top center, overlapping loops in the top right, a star-like shape on the far right edge, a wavy line in the bottom left, a series of small 'v' marks in the bottom center, and a large loop in the bottom right.
